

## What is covered?

Trimble® Civil Construction software provides that critical performance you need to manage, process and create deliverables for your customers more quickly. As you want to keep that software running efficiently, even after the software warranty period, Trimble offers additional coverage with Trimble Protected Plus software protection plans.

After the expiration of the original software warranty period, Trimble Protected protection plans cover:

- Compatibility with added hardware
- Access to ongoing software updates and enhancements
- Fixes to known issues

**If your software is not currently covered by a protection plan or warranty, we offer a reinstatement option to bring your software back under a protection plan coverage.**

## Benefits

- **Greater efficiency**—a software protection plan keeps your data workflow set running at the highest performance level possible.
- **Adding value**—your software plan becomes more valuable to your business when you add a Trimble Protected Plus protection plan; it is the only way to get ongoing software updates and enhancements from Trimble other than purchasing new software.
- **Working together better**—A protection plan prevents incompatibility issues between software and the hardware in the field.
- **Be worry-free**—save time and money with a software protection plan.
- **Reassuring**—a protection plan gives you the ability to relinquish and transfer a license to another eligible\* device.

\*See your dealer for more information.

## Products

The Civil Construction family of software products covered by a Trimble Protected Plus protection plan include:

**Groundworks Machine Control System:** land-based, 2D/3D drilling and piling system.

**SCS900:** site controller software.

**Siteworks Machine Guidance:** software that delivers site position, machine guidance, in-field design and reporting.

**Trimble Earthworks:** grade control software application that runs on Android™.

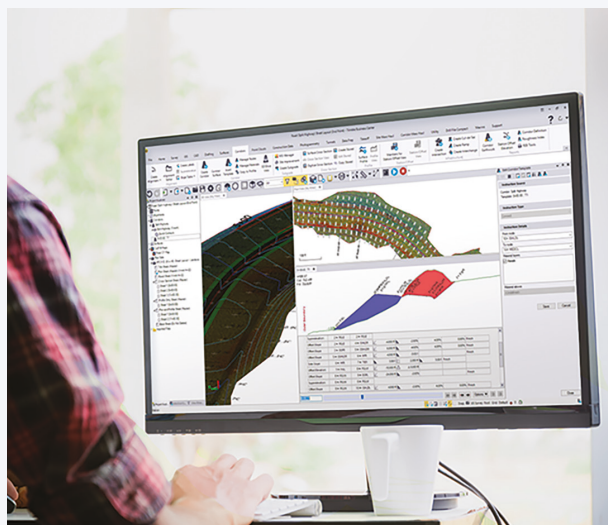

**Trimble Roadworks:** 3D paving control platform.

**Trimble Business Center:** field-to-finish CAD software.

 **Trimble** Protected
